

SHAYAN KHAN

PENETRATION TESTER | API & LOGIC SECURITY SPECIALIST | BUG HUNTER

Location: Takht Bhai, Mardan, Pakistan

Phone: +92 323 6828840

Email: shayankhan.vop@gmail.com

GitHub: github.com/shayan-khan-cadet

Portfolio: shayan-khan-cadet.github.io

EXECUTIVE SUMMARY

High-Impact Security Researcher specialized in identifying and remediating high-severity business logic, race conditions (CWE-362), and API security flaws before malicious exploitation. Proven record of discovering critical vulnerabilities in enterprise platforms including **WisdmLabs (AI BotKit)**, **Taskplanet**, and **Walee** with direct endorsements from Product Heads and Founders for exceptional reporting clarity and responsible disclosure ethics.

KEY DISCLOSURES & VERIFIED BUSINESS IMPACT

TARGET ORGANIZATION	VULNERABILITY & TECHNICAL SCOPE	IMPACT	EXECUTIVE ENDORSEMENT
WisdmLabs (aibotkit.io)	Race Condition (CWE-362) in chatbot onboarding endpoint allowing creation limit bypass across paid account tiers.	✓ Fixed	Alpesh Patil Product Head
Taskplanet	7+ Critical Logic Flaws covering reward redemption bypasses, payment verification, and access controls.	✓ Fixed	Himanshu Singh Founder
Walee	Price Manipulation / Logic Bypasses within backend checkout payment workflows.	✓ Fixed	Ebad Karim Product Manager
Vajraglobal	Public S3 Bucket Exposure leaking internal confidential documents and credentials.	✓ Fixed	Rex Security Team

PROFESSIONAL EXPERIENCE

Vulnerability Disclosure Researcher (VDP) & Bug Hunter

2024 – Present

- Execute targeted penetration testing across web applications, REST APIs, and SaaS authentication endpoints.
- Discovered and responsibly disclosed a tier-bypass ****Race Condition (CWE-362)**** on WisdmLabs' AI BotKit platform.
- Identified 7+ critical vulnerabilities on Taskplanet spanning payment verification and access control logic.
- Deliver concise proof-of-concept (PoC) reports with detailed remediation guidance, enabling engineering teams to patch within SLA limits.
- Collaborate directly with executive stakeholders (Product Heads, CISO, Founders) through post-remediation verification.

Independent Security Researcher

2023 – Present

- Proactively audit attack surfaces for organizations lacking dedicated in-house security teams.
- Author comprehensive PoC documentation outlining realistic CVSS risk scoring and actionable defensive recommendations.

TECHNICAL CORE COMPETENCIES

Vulnerability Assessment:	Race Conditions (CWE-362), OWASP Top 10, IDOR, Privilege Escalation, SQLi, XSS, CSRF
API & Logic Security:	API Endpoint Audit, Payment Logic Manipulation, JWT Attacks, Rate Limit Bypasses, Mass Assignment
Tools & Environment:	Burp Suite Pro, Nmap, Metasploit, Python (PoC Development), SQLmap, Linux / Kali Linux
Reporting & Ethics:	Responsible Disclosure Protocols, Executive Summaries, CVSS Scoring, Remediation Advisory

EXECUTIVE RECOMMENDATIONS

"We appreciate the time, effort, and professionalism you brought to researching and clearly documenting this issue... Reports like yours genuinely help us build a more secure product." — Alpesh Patil, Product Head WisdmLabs	"Shayan's testing uncovered multiple critical vulnerabilities across reward redemption, payment verification, and access controls. His report helped us strengthen platform security." — Himanshu Singh, Founder TaskPlanet	"Shayan demonstrated exceptional professionalism in identifying and reporting a critical business logic flaw. His detailed report made remediation seamless." — Ebad Karim, Product Manager Walee
